
⊗ NOTE:- 15 CUFT/T IS USED FOR TONNAGE ESTIMATES DUE TO HIGHLY OXIDIZED, BROKEN & LOOSE CHARACTERISTICS OF THE "CHIMNEY OR PIPELIKE" ORE-SHOOT. WITH PAST MINED ORE-SHOOTS HAVING HAD MUCH GREATER LENGTH ON "DIP" THAN ON "STRIKE" IT APPEARS TONNAGE IN THIS AREA WILL BE GREATER THAN THE ESTIMATED 255 T SHOWN ABOVE.

EXCEPT FOR QUARTZ-MONZONITE IN STOPE AREA THE 460 LEVEL IS CONFINED TO LIMESTONE FORMATION.
