MINERAL COMMODITY MAP OF ALASKA

Distributed by the Mineral Industry Research Laboratory, University of Alaska, Box 95303 Fairbanks, Alaska 99701

BASE MAP FROM U.S.G.S. ALASKA MAP 'E'. (SCALE 1:2,500,000).

DATA FROM MINERAL INDUSTRIES RESEARCH LABORATORY REPORT 24, V 2.

REPORT IS COMPUTER PRINT-OUT OF DATA IN STATE DIVISION OF GEOLOGICAL SURVEY'S KARDEX FILE. INFORMATION IS CURRENT TO 1969 IN RECORDING DISTRICTS 1 & 6, AND TO 1970 IN DISTRICTS 2, 3, 4 & 5.

NOTES:-

1. The accuracy of the data in the report has not been checked.
2. Where information is incomplete, data have been omitted.
3. Where more than one commodity is listed in data (ie. Cu,Pb,Zn), the first one is considered as the prime commodity.
4. Each entry in the report is plotted as a single point, but may represent several claims.
5. Each point was plotted by hand on a 5'(N-S) by 10'(E-W) grid system to combine accuracy with clarity.

LIST OF COMMODITIES PLOTTED AND THEIR CHEMICAL SYMBOLS

ANTIMONY	Sb	COLUMBIUM	Cb	MERCURY	Hg	SULFUR	S
ARSENIC	As	COPPER	Cu	MOLYBDENUM	Mo	THORIUM	Th
BARIUM	Ba	GOLD	Au	NICKEL	Ni	TIN	Sn
BERYLLIUM	Be	GYPSUM	Gy	PALLADIUM	Pd	TUNGSTEN	W
BISMUTH	Bi	IRON	Fe	PLATINUM	Pt	URANIUM	U
CHROMIUM	Cr	LEAD	Pb	RADIOACTIVE	RA	ZINC	Zn
COBALT	Co	MANGANESE	Mn	SILVER	Ag	ZIRCONIUM	Zr

KEY TO MAP SYMBOLS

NOTE

Map symbol refers to first listed or prime commodity; additional commodities are indicated by chemical symbol (eg. Cu,Pb,Zn = ○~Pb,Zn)

PLACER LOCATIONS

- GOLD
- OTHER, indicated by chemical symbol

LODE LOCATIONS

- △ GOLD ONLY
- ▲ GOLD + OTHER COMMODITY
- ○ COPPER
- □ LEAD
- ⊠ ANTIMONY
- ● IRON, NICKEL, CHROMIUM, COBALT or MANGANESE
- TIN
- MERCURY
- TUNGSTEN
- BISMUTH
- \+ MOLYBDENUM
- ✳ PLATINUM
- ♦ URANIUM, THORIUM, RADIOACTIVE

(chemical symbol used in addition to map symbol where space permits)

OTHER LOCATIONS

- COAL
